HotCLM demo document

NOT A REAL CONTRACT. This file was generated for the HotCLM demo dataset.

Contract version - Clean copy

Stands in for the agreed text with every change accepted: the copy that goes out for signature. Signing needs a current clean version.

It carries no contract terms, names no party and bears no signature. Every seeded row of this kind holds its own copy of this same file; the seed stores one per row.

Shipped in the HotCLM repository under src/data/fixtures/ (Apache-2.0).
