HotCLM demo document

NOT A REAL CONTRACT. This file was generated for the HotCLM demo dataset.

Contract version - Draft

Stands in for the first draft a business requester starts a contract from.
Version 1 of a seeded contract, filed by the requester who launched it.

It carries no contract terms, names no party and bears no signature. Every seeded row of this kind holds its own copy of this same file; the seed stores one per row.

Shipped in the HotCLM repository under src/data/fixtures/ (Apache-2.0).
