HotCLM demo document

NOT A REAL CONTRACT. This file was generated for the HotCLM demo dataset.

Contract type template

Stands in for the standard paper a contract type is drafted from.
Launching a contract of this type hands this file to the drafter as version 1;
nothing fills it in.

It carries no contract terms, names no party and bears no signature. Every seeded
row of this kind holds its own copy of this same file; the seed stores one per row.

Shipped in the HotCLM repository under src/data/fixtures/ (Apache-2.0).
